

LOCTITE LIOFOL LA7660 : LA6248 SOLVENTLESS ADHESIVE SYSTEM

Quadra is the largest volume supplier of solventless and solvent-based flexible packaging adhesives across Canada. As the exclusive distributor for Henkel, the world's top manufacturer of specialty adhesives, heat seal, and cold seal technologies, Quadra provides solutions which enable you to be more efficient and profitable. With a combined 70+ years of experience in the flexible packaging market in Canada, Quadra's Commercial Team offers on-site expertise and training to improve adhesive performance, reduce waste and improve your bottom line.

DESCRIPTION - LOCTITE LIOFOL LA7660 combined with LA6248 is a 2 component Solventless Polyurethane adhesive designed for Flexible Packaging laminating. Mix ratio 1 -1 by weight. Pot life- 55 Min. Cure to slit in 6-12 hrs. PAA free for food filling in 48 hrs *, (pet/1.5mil Ldpe). This system is specially designed for laminating digital printed applications or where issues with ink smear on applications where nitrocellulose solvent based inks are used.

TARGET APPLICATION - Designed for general to medium performance applications at line speeds more than 300MPM. This adhesive is designed for use in most film /film, film/ foil packaging laminations when fast turn around or rapid zipper insertion is necessary. These applications can range from nuts, snack, confection, meat cheese, coffee, pasta, or general food packaging.

FDA STATUS - This adhesive is approved under FDA CFR 175-105 Indirect food contact laminations. The food contact layer should have barrier properties equal to or better than 1mil LdPe.

APPLICATION - Use of a Meter Mix dispensing unit (MMD) is recommended for all solventless adhesive products.

Please contact Quadra chemicals for SDS sheets or in depth Technical data sheet for application or processing information.
