

LOCTITE LIOFOL LA7998 : LA6094-22 SOLVENTLESS ADHESIVE SYSTEM

Quadra is the largest volume supplier of solventless and solvent-based flexible packaging adhesives across Canada. As the exclusive distributor for Henkel, the world's top manufacturer of specialty adhesives, heat seal, and cold seal technologies, Quadra provides solutions which enable you to be more efficient and profitable. With a combined 70+ years of experience in the flexible packaging market in Canada, Quadra's Commercial Team offers on-site expertise and training to improve adhesive performance, reduce waste and improve your bottom line.

DESCRIPTION - LOCTITE LIOFOL LA7998 / 6094-22 is a fast curing 2 component aliphatic Solventless Polyurethane adhesive designed for Flexible Packaging laminating. Mix ratio 1-1 by weight. Pot life- 55 Min. Cure to slit in 6-12 hrs.

TARGET APPLICATION - Designed for high performance applications at line speeds more than 300MPM. It's designed for use in film /film packaging laminations where resistance to UV light or outdoor applications are required. These applications can range from fertilizer and soil bags. Applications can also include any food application. This product should not be used on applications where foil or metalized films are utilized.

FDA STATUS - This adhesive is approved under FDA CFR 175-105 Indirect food contact laminations. The food contact layer should have barrier properties equal to or better than 1mil LdPe.

APPLICATION - Use of a Meter Mix dispensing unit (MMD) is recommended for all solventless adhesive products.

Please contact Quadra chemicals for SDS sheets or in depth Technical data sheet for processing and curing information.

*** Cure depends on accurate mix ratio, 35% relative humidity and a minimum 20C storage temperature.**
