# ADDISP™ Wetting & Dispersing Additives

## ADDISP™ 250 & ADDISP™ 600N

Modified polyacrylates providing excellent pigment stabilization of fillers and especially Titanium Dioxide, improving wet scrub and rub out properties.

## ADDISP™ 750

A wetting and dispersing additive for both organic and inorganic pigments and oxide type pigments.

## ADDISP™ 950

A new versatile universal wetting and dispersing additive for high-grade resin free pigment pastes, suitable for both water borne and solvent borne applications. ADDISP™ 950 is APEO and VOC free and a high-molecular weight non-ionic additive. It is highly effective in milling of carbon blacks and highly concentrated pigment pastes.

## ADDISP™ 850 & ADDISP™ 550

The range is completed with two grades for the sustainable additives range of ADDAPT Chemicals BV. ADDISP™ 850 is a dispersing agent, which can be used in combination with the wetting agent ADDISP™ 550. Both additives are biodegradable, APEO, solvent and VOC free.

**“No ball mill needed”**
