

TOMAMINE® M-7220

DESCRIPTION

TOMAMINE® M-7220 is an alkyl ether diamine based collector that is designed to aid in quartz removal in reverse flotation of iron ore, feldspar and calcite.

BENEFITS

- Efficient reverse flotation collector for removal of quartz and silica minerals from various ores
- Clear, low viscosity liquid
- Low pour point

APPLICATIONS

- Reverse flotation of iron ore, feldspar and calcite
- Reverse flotation of phosphate ores

HANDLING PRECAUTIONS

Please refer to our material safety data sheet for information concerning

- Classification and labelling according to regulations for transport and for dangerous substances
- Protective measures for storage and handling
- Measures in case of accidents and fire
- Toxicity and ecological efficient

RECOMMENDED USAGE

The TOMAMINE® M-7220 collector use level can best be determined in consultation with our team of applications chemists. Please contact our sales manager or technical expert.

STORAGE AND HANDLING

TOMAMINE® M-7220 can be stored in the original sealed containers at room temperature for 12 months.

PACKAGING

TOMAMINE® M-7220 is available in unlined 178 kg drums or 883 kg totes.

PROPERTIES¹

Appearance	Light Yellow Liquid
Density	0.85
Viscosity @ 20 C (mPas)	34
Flash Point °C	>93.3
Freezing Point °C	-34.4

¹ These are typical properties only and do not represent sales or manufacturing specifications.
